Summary of all our user stories in the project by requirement

Orders history table - landlord page

As a landlord, i want to be able to view my orders in dedicated table, so i can manage my track after my incomes from it.

In this table, the landlord could see the order's rent per month, contract end date, name of the student who is renting the apartment and the address of the apartment. the landlord could also choose a row from the table and view more details about this order.

🖉 Edit Description

Tasks

☰ ☐ Load the table details from our database from orders table

☰ ☐ For more details about the order - add a link to each row to transfer to details page

☰ ☐ Decide about table desgin - css/bootstrap classes

☰ ☐ Option to edit (remove or change - no add new row option) row/s in the table
